

Customer Club Observability — C4 container diagram

Laptop / lab stack · Docker Compose project customer-club-obs · LGTM with Prometheus as M · Apps are outside this repo

Inventory — what this repo has vs does not

LGTM here means Loki + Grafana + Tempo + Prometheus (Mimir is the scaled-out M; not used on this laptop).

In this Docker Compose project

Component	Status	Role	Laptop port
Loki	Has	Log store	3100
Grafana	Has	One UI, Explore, one stack-health dashboard	3300
Tempo	Has	Trace store + span-metrics to Prometheus	3200
Prometheus	Has	Metrics (stands in for Mimir)	9090
otel-collector	Has	OTLP intake, PII filter, routing	4317 / 4318 / 9464
Alertmanager	Has	Alert routing UI — no bank webhook yet	9093
blackbox-exporter	Has	HTTP/TCP probes of the apps	internal
node-exporter	Has	Host CPU / disk / memory	internal
cAdvisor	Has	Container metrics	internal
telemetrygen x3	Has (profile demo)	Synthetic traces / metrics / logs	—

Intentionally not in this repo (wrong scale or wrong place)

Component	Status	Why
Mimir	Not here	Multi-cluster metrics. Prometheus is enough for Compose / one bank pair of hosts.
Distributed Tempo / Loki	Not here	Single-binary is the laptop and first prod shape.
Pyroscope	Not here	CPU line-level profiling — later, not required for LGTM.
Grafana Alloy	Not here	Chose CNCF otel-collector-contrib instead.
Seq / Elasticsearch	Not here	Replaced by Loki + OTLP.
.NET / Vue instrumentation	Not this repo	Lives in customer-club-api and customer-club when you add OTLP.

In the target bank architecture, not built in this compose yet

Component	Status	Notes
sql-exporter	Missing	SQL wait stats, deadlocks, index DMVs.
Edge collector (second agent)	Missing	Laptop uses one collector; prod Edge .18 needs its own forwarder.
nginx log scrape + /otel/ RUM path	Missing	Needs customer-nginx change in the app deploy repo.
RED dashboards for customer-api / login / nginx	Missing	Only stack-health.json exists.
Real alert channels	Missing	Email / SMS / bank SOAR webhook.
Grafana OnCall / paging roster	Missing	Alertmanager UI only.
